A Farm of Many Colors

Kindergarten | 45 Minutes

After reading though the book "A Farm of Many Colors," students will have a hands on lesson to learn more about Wisconsin Dairy. Along with the lesson will be a tasty and colorful yogurt treat. (Prefer to have 1-2 Adults to help)

I Scream, Ice Cream!

Grade 3-4 | 60 Minutes

We all scream for ice cream...Students will learn about the responsibilities of a farmer by acting as a farmer for the day. We will work together as a Farm Team to be successful in our project. If we are patient, respectful, and work hard as a team, we will be able to enjoy the home-made ice cream we made as a Farm Team. *Shh don't tell the students the end product.

More Cheese Please

Grade 3-4 | 60 Minutes

Learn how Wisconsin became American's Dairyland and watch a short video on how Wisconsin cheese is made. Students will put their tastebuds to the test as they play "Cheese Boozled." Try guessing what cheese they ate!

Lets Talk About TMR

Grade 1-4 | 45 Minutes

Let's put our aprons and chef hats on to take a closer look at the ingredients that goes into making a batch of food for the cows. Students will be able to feel and smell the ingredients while learning the process of how it gets from seed to eating. Students will test their math skills by making their own TMR.

Modern Day Farm Life

Any Grade | 45 Minutes

Farmers take care of animal and drive big tractors, but what else do they do every day? Learn about a modern day life on the farm. We bring parts of the farm to you!...And we might bring some of the smells! Discover what cows eat and how they are milked. An optional snack of making homemade butter.

All programs are FREE!

Snacking Around WI

Grade 3-4 | 45-50 Minutes

Let's take a trip around our great state and learn about the different food products made here by Wisconsin farmers! We can't forget about taste buds! By the end, each student will have a trail mix of all the products to try from Wisconsin.

Soil

Grade 3-4 | 45 Minutes

Soil is a key key aspect in growing our delicious foods and farmer's crops. This lesson we take a close look into the different layers of the soil and their role into helping the ground and crops grow. Students will have the opportunity to make their own soil (dirty cup) to enjoy.

Seasonal Lessons

Totes My Goats

K-2nd | 45 Minutes

Its spring time and you know what that means?! BABY GOATS! Want baby goats to visit your classroom? This lesson we will learn about all aspects of goats. From learning different breeds, their milk production, foods they eat, and being to interact with live baby goats! (This lesson is offered in February-March typically. Watch for post on our Facebook.)

What's Happening on the Farm

4 Grade | 30-45 Minutes

Farmer's work 365 days out of the year. They pour their time, dedication, and passion into what they do. This lesson is a monthly update on things happening around the farm. If this is something your interested in for your classroom. Please reach out to me as this is a new lesson I recently created.

All programs are FREE!
